

Thank you for choosing IST diving equipment.

Our products are made from high-quality materials, and through careful monitoring during production, we ensure that you can enjoy every moment with our equipment.

USER MANUAL FOR THE GAUGE MASK

1. This equipment allows you to see underwater. Use it correctly, and it will serve you well.
2. To prevent fogging of the lens, apply some anti-fog solution to the inside and then rinse it with water.
3. Important usage note: The use of this mask is only permitted after proper instruction by a qualified professional and is intended for experienced swimmers. Improper use can lead to serious health risks.
4. If you feel the mask is pressing against your face due to water pressure, exhale gently through your nose.
5. If you plan to dive deeper than 3 meters (9-10 feet), seek advice from a properly qualified dive instructor.
6. Do not take more than three deep breaths before diving below the surface. Excessive breathing can lead to loss of consciousness underwater.
7. Be aware that your natural buoyancy decreases as you descend. This means you need to swim upwards before you start drifting back to the surface.
8. To achieve the maximum lifespan for rubber/silicone products:
 - Avoid unnecessary sun exposure.
 - Avoid contact with oils and fats. Some sunscreens and lotions have an oily composition.
 - Avoid heat exposure and contact with hot surfaces.
 - Store the items in a cool, dry place in a box or bag, out of direct sunlight, and do not deform them during storage.

This mask complies with the requirements of EU Regulation 2016/425. For further information, please refer to the Declaration of Conformity.

The manufacturer/importer assumes no liability for damages resulting from improper use.
